

TITLE OF INVENTION

WATER RESISTANT FABRIC AND METHOD FOR MAKING

5

ABSTRACT OF THE DISCLOSURE

Water resistant laminates that can be useful in end  
uses requiring a water tight membrane comprising a layer  
10 of fabric, wherein a first polymer having a certain  
stress index that is substantially contained within the  
fabric layer and a second polymer having a higher stress  
index than that of the first polymer that can be coated  
onto one or both surfaces of the fabric.
